Our customers include:

- Fire protection
- Design & process approvals
- Drinking water
- Meeting the highest industry standards

DIN 5510-2
DIN EN 45545-2
UNI
CEI 11170
EN 15085-2

Conformity laboratories with our technical take for Angst Engineering, standards and certifications solutions our railway railway customers are within industry and benefit representatives which are recognized globally for their expertise.

Angst + Pfister – Your supply and solutions partner

As a supply and solutions partner for engineering plastics, sealing, fluid handling, drive, and antivibration technology as well as various, Angst Pfister combines efficient logistics concept with comprehensive product application engineering services. Besides providing customer-specific parts, the Group offers a product range consisting of approximately 100,000 standard items.

Our core product divisions:

- APSOparts® Engineering Plastics Technology
- APSOpall® Sealing Technology
- APSOpall® Fluid Handling Technology
- APSOdrive® Drive Technology
- APSOact® Actuation Technology

Services from Angst + Pfister Group

The Angst Pfister Group is a leading international technical manufacturer and service provider for high-end industrial components, in supply and solutions partner for engineering plastics, sealing, fluid handling, drive, and antivibration technology as well as services.

Our customers include:

- AIMB-TEC
- HNO
- ISO
- Boeing
- NASA
- 3M
- Dow Chemical
- DuPont
- Siemens
- ABB
- Linde
- SKF
- ABB MHI
- Siemens
- ABB Sanyo
- SIEMENS
- Yaskawa
- Toshiba
- OMRON
Angst + Pfister — One Partner Producing Technical Components in Multiple Rolling Stock Applications

Ensuring smooth operation on the tracks and in the carriages

Since 1953, Angst + Pfister has supplied the railway industry’s leading manufacturers and operators with custom-made high-quality products and comprehensive engineering solutions. Railway manufacturers, maintenance organizations and track installers all benefit from our long-standing industry experience and our engineering expertise.

Reliable logistic and customer focus worldwide

Over the years, Angst + Pfister has built up a comprehensive team of highly qualified application engineers who have extensive expertise across a broad range of industries. Under the APSO (Angst + Pfister Solutions) brand, our engineering specialists develop customized solutions for practically any application within our five core product areas.

Angst + Pfister’s engineering services offer technical know-how and support, including:
- Design and development support (CAO, CAD)
- Experimental validation and virtual design
- Material and compound specification
- Industry approvals and certifications
- Technical seminars and training courses

A comprehensive logistics infrastructure means that the right products are getting to their destination when and where they are required. Highly automated processes, supported by an electronic order processing system, characterize the Angst + Pfister Logistics Center. Thanks to our extraordinary international network, “just-in-time” delivery is supplied to all our customers, no matter the location.

From Standard Products to Customer-specific Solutions

Over the years, Angst + Pfister has built up a comprehensive team of highly qualified application engineers who have extensive expertise across a broad range of industries. Under the APSO (Angst + Pfister Solutions) brand, our engineering specialists develop customized solutions for practically any application within our five core product areas.

The perfect global production platforms: high-quality components for the highest requirements

Angst + Pfister has production facilities in 15 countries worldwide. This global network can provide our customers with the most competitive production environment, which means that our logistics can meet the most demanding requirements. Being a company that is certified according to ISO 9001:2000, we make every effort to completely meet the quality requirements of our customers.

Engineering services expertise all along the line

Technical industry expertise from around the globe that benefits our local customers
