

APSOvib® – forward-looking solutions for antivibration technology

The APSOvib® name stands for customized and cost-optimized solutions for every antivibration technology challenge, drawing on Angst+Pfister's outstanding application expertise and the vast range of APSOvib® antivibration elements.

The new APSOvib® rubber metal rails are representative of Angst+Pfister's APSOvib® philosophy: excellent value for money and direct availability of all sizes and hardnesses from one of the world's most extensive assortments of vibration isolation elements.

APSOvib® rubber metal rails ensure the necessary stability for heavy machinery.

- APSOvib® rubber metal rails are used in the case of relatively high loads, or if the shape and dimensions of the supporting elements are not suitable for installing buffers.
- APSOvib® rubber metal rails are particularly suitable for elastic storage of heavy installations, mainly under compressive loads.
- APSOvib® rubber metal rails are manufactured in 2-meter lengths and can be tailored precisely to your requirements on request. The thickness of the metal plates permits subsequent insertion of threads.

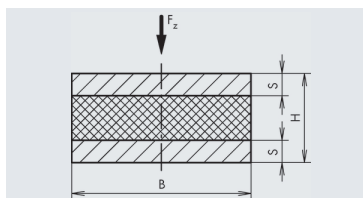

APSOparts®

the Online Shop of Angst+Pfister
www.apsoparts.com

You can order the new APSOvib® rubber metal rails right away from our APSOparts® online shop. APSOvib® rubber metal rails in stock are shipped on the next business day. As a special incentive, there is no small-order surcharge on orders placed via APSOparts®!

APSOvib® rubber metal rails
