

ANGST&PFISTER ENVIRONMENTAL POLICY

As ANGST& PFISTER Advanced Technical Solutions A.Ş., we have assumed a main approach to protect the environment and ensure its sustainability in all activities of our plant which manufactures rubber and rubber-metal components.

With this belief and by complying with our principles, we commit:

- **To keep the consumption of sources (energy, water, fuel etc.) in all our processes under control,**
- **Adhere to all liabilities of environmental laws and regulations,**
- **To take the necessary measures to reduce the discharges**
- **In the context of technical and economic facts; using environmental friendly technologies to prevent environmental pollution,**
- **To adopt and implement the understanding of the re-cycling and re-using of the materials in the plant,**
- **To establish and continuously develop an Environmental Management System as part of establishment of a sustainable environment,**
- **And to evaluate the environmental impacts in all new projects**

A company committed.

Our target to bring this policy to life is;

To protect the environment, knowing that it is a universal worth, and to create a conscious and trained society which is respectful to the environment, with the support of our customers, suppliers, and employees.
